

CASE STUDY

SKEMA chooses TestWe

Interview with Jocelyn Wissocq, administrative officer, SKEMA Paris

- SKEMA implemented TestWe in 2015
- used it on 3 000 students and more than twenty professors

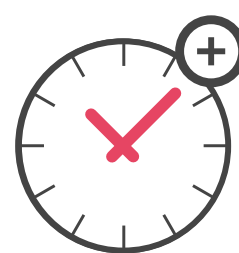

Thanks to TestWe

- > Assessments processes are now flexible and 100% secure
- > Our solution adapts to professors' creativity
- > Significant time saving on assessment creation and grading
- > *"Exams are entirely secured and do not need any Internet connection."*

25% saved costs

550 reassigned hours

76.514 sheets of paper saved

SKEMA Business School chose TestWe to pulse innovation at school and to save more time when organizing and executing exams. Security was also an important issue for the school.

TestWe answered the call: *"exams are entirely secured and do not need any Internet connection"*, our solution was the only one to offer efficiency and simplicity in this domain, according to Mr. Wissocq. He gladly recommends us as being the most secure and reliable solution provider. Moreover, *"the team is always listening to suggestions, remarks and rapidly evolve. Thus, there wasn't any issues during the assessments."*

Finally, his advice to any institution interested in installing e-Exam solution like TestWe:

"Communicate with your teachers from the very beginning of the year so that they can be autonomous and creative with the platform, which is adaptable to all of their needs."
